## Work Experience

### Financial Analyst

(2022-now)

Ontario Public Service

- Developed and presented financial reports to senior management, providing key performance indicators and trends to support business decisions.
- Successfully reconciled payments on a regular basis, ensuring accuracy and identifying discrepancies in a timely manner to maintain financial integrity.
- Utilized financial software and tools to manage financial data and produce accurate and timely financial reports for stakeholders.
- Provided information and advice on financial issues and their implications and resolved financial disputes and invoicing issues.

### Lifeguard

(2016-2019)

City of Toronto

- Supervised and maintained the safety of swimmers by monitoring pool areas and responding to emergencies, including providing first aid and performing CPR when necessary.
- Enforced pool rules and regulations, ensuring a safe and enjoyable experience for all swimmers while maintaining a positive and professional demeanor.

## Relevant Project

University of Waterloo

(2021)

- Demonstrated hands-on experience with cleaning data from climate models, data visualization, interpreting and communicating data analytics findings.
- Transformed complex scientific data about climatic processes into meaningful insights.
